

## YOUR OLD MACHINE...

Old folding machines like this one can be tough and sturdy, but their electrical control systems usually aren't.

## ...HAS SOME NEW TRICKS

Pathfinder controls will give your folding machine new life, improve its performance and make it capable of doing so much more than it did before.

### NEW LIFE, NEW PERFORMANCE, NEW TRICKS

## NEW LIFE

### Extend the life of your machine

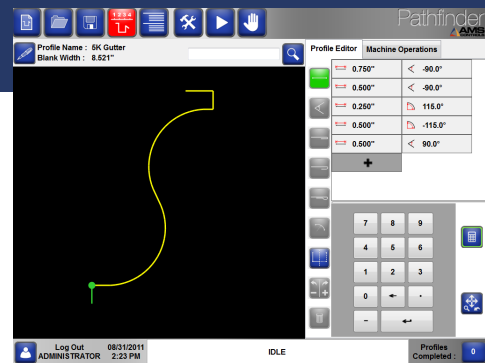

Older folding machines are durable and long-lasting, but their electrical control systems are not. Add 15-20 years of life to your machine with a simple upgrade to a Pathfinder controller.

## NEW PERFORMANCE

### Improve performance for a fraction of the cost of a new system

Pathfinder controls can fix problems with older machines as well as improve accuracy, speed, reliability and safety.

## NEW TRICKS

### Old machines can learn new tricks with Pathfinder controls

Pathfinder includes SmartPath auto-sequencing to automatically calculate the best sequence of bends to make each part, no matter how complicated. SmartPath creates a level playing field where every operator, regardless of experience, can operate the machine at the same advanced level.

With Pathfinder, your folding machine will also:

- Perform easy radius bends
- Integrate with the front office
- Have an unlimited part library

## SMARTPATH™

Sketch a part profile on the touchscreen and Pathfinder automatically determines the best way to create the part.

We call this feature **SmartPath™** automatic bend sequencing software. **SmartPath** will save you time, eliminate guesswork and allow every operator to create parts easily and quickly with minimal training.

Pathfinder control systems are designed and manufactured in the U.S.
